

MicroStrategy Administrator

Overview:

This one-day course is designed to provide students with a fundamental working knowledge of MicroStrategy Administrator. Participants will learn the use of Command Manager, Enterprise Manager, Object Manager, Project Merge Wizard and User Merge Wizard. Participants will learn how to duplicate projects, merge projects and users, execute and create scripts to accomplish various administrative tasks. Students will also learn to configure Enterprise Manager and become familiar with its predefined reports. These topics will be reinforced with hands-on workshops and interactive discussions. At the end of this course, students will have an understanding of the important concepts required for the successful administration of a business intelligence platform using MicroStrategy Administrator.
